

STITCHTUFT – A NEW TYPE OF EMBROIDERY

SPECIAL EMBROIDERY MACHINE TUFTMASTER
SERIE JAT

THE ART OF EMBROIDERY

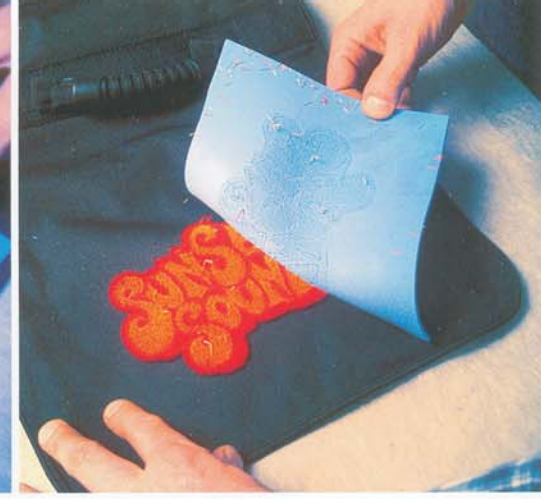

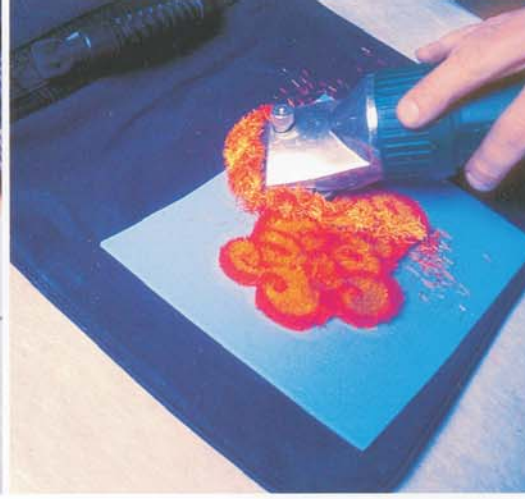

„StitchTuft is fascinating, new and unique regarding its look and feeling.“

Christian Moll, Head of Marketing ZSK

ONLY A FEW
STEPS NEEDED TO CREATE
EXTRAORDINARY DESIGNS

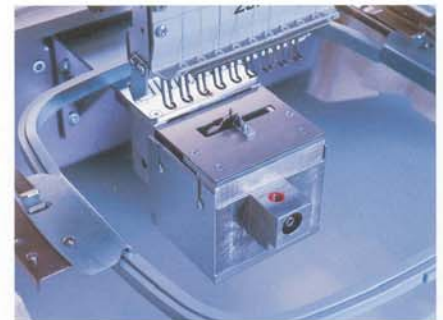

StitchTuft is a completely new procedure in textile finishing which is realized with a special embroidery machine – the TuftMaster – which is fitted especially for this purpose.

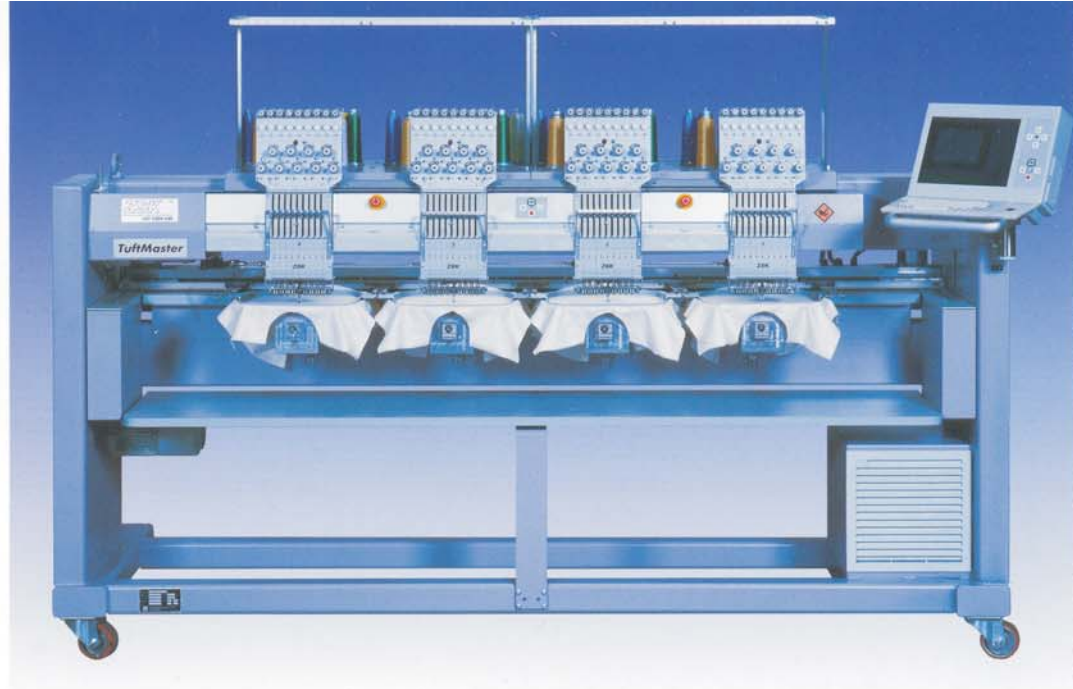

An extremely soft pile of yarns placed side by side is prepared, similar to a carpet. Depending on the yarn, the number of colors, the density and the pile height, countless different embroidery designs and combinations can be created. In addition to the optical experience, StitchTuft also provides a brand-new haptic experience.

StitchTuft thus opens up new ways in fashion, promotion, corporate clothing, leisure wear, home textiles etc.

StitchTuft is produced by means of special “TuftMaster” machines with one, two and four embroidery heads with nine needles/ colors each.

- The fabric is clamped with the future visible side pointing to the bottom.
- For the temporary fixing of the threads a PU foam is applied.
- The loops occurring during embroidery are cut with every stitch.
- The backside is fixed with transfer adhesive, as it is embroidered without lower thread
- The StitchTuft is cut to the same height.
- Stripping-off the foam layer – ready!

TuftMaster	JAT 0109	JAT 0209	JAT 0409
Embroidery heads	1	2	4
Needles/colors	9	9	9
Embroidery field width	500	495	400
